Business Basic Information

 Verified by D&B

D-U-N-S® Number 65-600-6848
Business Registration No. 07220508
Company Name TUNG PEI INDUSTRIAL CO., LTD.
Company Type a private company limited by shares
Company Operating Address 10F, No. 142, Zhongxiao E. Rd., Sec. 4, Da'an Dist., Taipei City, Taiwan
Phone +886-2-27417321
Fax +886-2-27416623
Email [Contact Us](#)
Company Website www.tpibearings.co/
Taiwantrade Website of Company tungpei.en.taiwantrade.com/
Line of Business Manufacture of Other Fabricated Metal Products Not Elsewhere Classified | Deep groove ball bearing;Angular contact ball bearing;Fluid dynamic bearing;Roller bearing;Flexible bearing
Main Products Deep groove ball bearing
Angular contact ball bearing
Fluid dynamic bearing
Roller bearing
Flexible bearings
Brand Name TPI
SIC Code 34990000, 35629901
Employee Here 1,000~9,999
Employee Total 1,000~9,999

About Company

☐ Provided by Customer

Founded in 1966, Tung Pei Industrial Co., Ltd. (TPI) is a leading bearing manufacturer in Taiwan, delivering high-quality, high-performance products used in motors, automotive and motorcycle components, machine tools, and high-end equipment. Headquartered in Taipei, Taiwan, TPI employs around 1,400 people locally and over 2,100 globally. In 2024, its annual revenue reached NT\$7.1 billion.

Innovation and Growth

TPI embraces a spirit of innovation and mutual prosperity with stakeholders. Since its 1967 technical partnership with Japan's NTN Corporation, TPI has consistently enhanced its technology and expanded globally. The TPI brand was launched in 1983, followed by the establishment of production facilities in China and Indonesia. Its product range has grown from deep groove ball bearings to angular contact, fluid dynamic, cross roller, and thin-section bearings, driving continuous industry innovation.

Global Presence and Manufacturing

TPI operates five major manufacturing sites in Taoyuan, Zhongli, and Longtan (Taiwan), Shanghai (China), and Jakarta (Indonesia). These facilities support vertically integrated production, from forging to assembly. TPI also runs two R&D centers and 16 global sales offices, providing comprehensive customer support worldwide.

Applications Across Industries

TPI bearings are used in diverse industries:

- Machine Tool Spindles – For high-speed, high-precision turning, milling, drilling, and grinding.
- Servo Motors – Offer precise positioning and speed control for dynamic applications.
- Ball Screws – Ensure high accuracy, long life, and low contamination for precision systems.
- Automotive Alternators – Perform reliably under high loads and extreme conditions.
- Motorcycles – Meet the performance demands of both local and global markets.
- Power Tools – Enhance tool stability and reduce vibration in tough environments.
- Fitness Equipment – Provide smooth, quiet operation for a better user experience.
- Quiet Air Conditioners – Use ultra-silent bearings for reduced operational noise.
- High-End Tablets – Apply fluid dynamic bearings in fans for noise reduction and stability.
- Bicycle Hubs – Deliver durability and smooth riding with precision-engineered bearings.

Technology and Smart Manufacturing

With full vertical integration from raw material to final product, TPI leverages an in-house design simulation platform for efficient modeling, interference checks, and mechanism analysis. The TMES smart manufacturing system integrates IoT, robotics, automated packaging, and AOI inspection for real-time quality control and process transparency. TPI's digitalized workflow is supported by advanced testing and measurement tools to ensure international compliance. For high-end applications, TPI continues developing high-speed, low-friction, and long-life bearing solutions.
