About Company

☐ Provided by Customer

From its humble beginnings in 1957 as a small food additive vendor, Gemfont has flourished together with the blossoming food industry in Taiwan, and evolved into a highly developed, multi-dimensional food ingredient and material supplier encompassing food processing, foodservice and health food sectors. With a progressive and innovative approach over its 65 years of history, Gemfont Corporation has become one of the most prominent leader in the food ingredient supplychain in Taiwan's food industry.

In addition to industry trend-setting RD team specialising in food product innovation and design, food safety and traceability make up the most critical part of Gemfont's core values. While accredited by FSSC 2200, and HACCP certificates, as well as TAF ISO/IEC 17025 Testing Laboratory and Biosafety Level 2 Laboratory certifications, and Taiwan FDA's Food Testing Institutions Accreditation, Gemfont continues to improve its material testing capabilities and expand its digital library of global food ingredient traceability. Gemfont is committed to provide quality, reliability, security and health&safety to its partners and customers.

As a longstanding regional distributor for world renown food ingredient brands, Gemfont is also equipped with liquid, sauces, powder and particle production lines and HALAL certified production facilities. Every step of the manufacturing process, from raw material inspection, production planning and scheduling, to delivery and logistics, is connected to and managed by the IT centre of the company, enabling Gemfont to provide fully integrated services to customers, including concept design, formulation, production, and sales and marketing. Leveraging these capabilities in core businesses of food additives, ingredients and materials, combined with partnerships with customers in international markets, Gemfont is the ultimate one-stop shop for customers looking for tailored solutions in manufacturing, foodservices, bakery, and health food sectors.
