About Company

☐ Provided by Customer

AFC was founded in Taiwan in 1973. AFC established its product base by research and development of special high function fibers. This led to further development of cleanroom textiles, specialized medical clothing, special-function & smart textile innovation. Our strategy is based on three key points: Create value, balance interests and manage a sustainable business.

It has taken us from becoming the dominant leader in Taiwan to our entrance into global markets. AFC is proud to be a pioneer and leader in the field of cleanroom and electrostatic discharge (ESD) products in Asia. Through our global business vision and through branches in different countries in the world, AFC has become the main supplier of these products to Europe, America, and Asia. AFC has obtained 32 patents to date and has our products being exported to 62 countries worldwide.

Since China is one of the most rapidly developing areas of the world, AFC established a manufacturing facility in Kunshan, China. This facility services the local China market. AFC has continued developing medical, healthcare and smart textile based on our core values of diversifying our business operation and pursuing corporation synergy. Our vision for the future is to promote "AFC" brand to the global market by creating unique product designs through teamwork and innovative research.
