About Company

Provided by Customer

Dahching Electric Industrial Co., Ltd.

Founded in 1979, Dahching Electric Industrial Co., Ltd. specializes in the design and manufacture of resistance welding equipment, including spot, projection, seam, flash butt, and inverter welders. Over the years, our brand identity has evolved as DAICHEN, yet both names stand for one company, one spirit, and one commitment to excellence.

For over four decades, Dahching has been recognized as a pioneer in Taiwan's welding industry, dedicated to automation, customization, and continuous innovation. The transformer—considered the "heart" of every welding machine—remains at the center of our design philosophy, representing precision, reliability, and strength.

Our expertise lies in developing custom-built solutions to meet each customer's specific production requirements. Rather than pursuing mass production, we emphasize consultation, engineering analysis, and realworld validation to deliver optimal welding performance and long-term value.

Beyond machinery, Dahching also integrates peripheral components, materials, and process technologies to help customers streamline production and accelerate product development. With Industry 4.0 in mind, we have introduced digital monitoring systems (WeldGraphix ProSync) that enable real-time data recording and quality assurance.

Dahching's equipment serves a wide range of industries — from aerospace, defense, automotive components, and rail infrastructure to grating panels, construction rebars, power electronics, and household appliances. Through countless welds, we connect Taiwan with the world, transforming every spark into the power that drives global progress.

At Dahching, we believe that innovation begins with people. Our team's craftsmanship, integrity, and shared vision form the foundation of our strength. Together, we continue to push boundaries, evolve with technology, and uphold the spirit that has defined Dahching for over 45 years — Driven by Devotion, Defined by Innovation.
