Line of Business Manufacture of Monitors and Terminals
Manufacturer of digital printers
Manufacture of Other Computer Peripheral Equipment
Main Products Laser Printers
Inkjet Printers
Marking & Coding Machines Digital Label Finishers
Cardboard Print Engines
Brand Name KP
Kpower
Winjet
SIC Code 35750100, 35770000, 35770102
Employee Here 10~19
Employee Total 50~99

About Company

☐ Provided by Customer

KPower, KP, & Winjet are the registered trademarks of KPowerScience Co., Ltd. (KPower)
Expert in high-speed, continuous feed digital printing technology since 1978.

Designing

Teamed with hardware, firmware and software engineers, we launched our first completely self-designed printer for computer forms in 2002. Having worked closely with end-users for decades, we have now expanded our product spectrum from laser printing equipment to include inkjet printing, processing and finishing systems. In the future, we aim for further advancement in digital printing/finishing solutions to satisfy short-run and on-demand needs of the industry.

Manufacturing

Our products take full advantage of Taiwan's the prosperous electrical and mechanical industries to maintain a flexible supply chain, ensuring the efficiency and cost-effectiveness of our manufacturing process. Our versatile production lines are specialized for a variety of customized projects and capable of providing OEM/ODM as well as contract manufacturing services.

Integration

As a printing technology holder, we have collaborated with technology holders of several other fields to seamlessly incorporate printing modules into larger systems. On the other hand, we work closely with end-users to make sure our products offer a comprehensive solution in fulfilling the needs of printing applications in the field.

Emulation

We work with system integrators to bring together all the technological components of your production line. For work places with multiple printers, we also offer printer management solutions. In production environments where replacement of printers is required, our controller technology enables our products to receive commands in a variety of printer languages. In this way, we ensure that no disruption of workflow will occur due to printer upgrades.

Business Registration Information

Registration Date 1978/10/19
Authorized Capital TWD 100,000,000
Paid Up Capital TWD 100,000,000
Registration Address No. 4, Lane 185, Huanhe St.
